

About Easylib Software Pvt. Ltd.

1. Founded by three software professionals in 1998. The company is in library software business since last 16 years. Its product Easylib is hailed as one of the more feature rich and user friendly software products in the area.
2. The company has over 550 customers. Over 400 customers have availed services of Easylib support in last one year indicating that they are actively using Easylib software products.
3. Easylib is now in the mode of bringing in more innovation of the software area. The software products provided by the company are
 - **Easylib 6.2a Web Version** - This is a web based library management solution. Apart from basic features, it has advanced features of Ability to customize Web OPAC, Managing Dynamic Dashboards with real time KPI performance, Data Quality Assessment and Improvement, RFID Support, Publications Management, Branch library management and many more.
 - **Easylib 4.4.2 Client Server Version:** This is our Library Management Solution in client server mode. Provides Requisition, Acquisition, Cataloguing, Membership Management, Circulation, Digital Library Management, Serial Control, OPAC, Web OPAC and Reports features.
 - **Display Board (Kiosk) Management** - This Software helps you manage library wide / campus wide information display kiosks.
 - **In Out Management Software** - Helps you track in and out from your library / campus and get necessary statistics.
 - **Easylib for Educational Societies** - Helps you connect all libraries under your University or Library Association or Educational Society. Provides easy upload and unified OPAC (no matter which LMS each individual library is using).
 - Easylib supplies Alumni Relationship Management software and Academic Process Management Software in partnership with Finvensys Technologies Pvt. Ltd. a startup based at Bengaluru.
4. Easylib offers both hosted solutions as well as in-premise installation for most of its products.
5. Easylib is also now working on getting ISO 9001 / ISO 29001 Certification. The company has already deployed Ticket Management System that helps customers record the support requests through the online portal. This helps measure the average response time as well as resolution time and thereby ensure that response and resolution times are within acceptable limits. Easylib continues to be focused on academic area and hopes to reach new heights.
