Core Values of Easylib

- ✓ Robust Product
- ✓ Reliable Service
- ✓ Continuous Innovation

Our Offerings

Easylib Software

RFID

Vidyanidhi Platform

Bar Codes

Cloud Hosting

Trusted by **over 500 colleges** at 10 states in India and in 7 Countries

|| Levels of Library Automation

- Basic Level – Bring order. E.g. Data entry. Automate routine tasks. No change to outside world.
- Expand the reach – E.g. Web OPAC, Issue Return etc.
- Perform Operations Better E.g. SMS, Email, Communication, Intelligence Cataloguing, Goal Setting
- Analyze the data E.g. Statistics, Analytics
- Predictions E.g. What to buy? When to staff more?

Siyali Ramamrita Ranganathan (12 August 1892 – 27 September 1972)

Siyali Ramamrita Ranganathan (S.R.R.) (About this sound listen (help·info) 12 August 1892 – 27 September 1972) was a mathematician and librarian from India. His most notable contributions to the field were his five laws of library science and the development of the first major faceted classification system, the colon classification. He is considered to be the father of library science, documentation, and information science in India and is widely known throughout the rest of the world for his fundamental thinking in the field. His birthday is observed every year as the National Librarian's Day in India.

He was a university librarian and professor of library science at Banaras Hindu University (1945–47) and professor of library science at the University of Delhi (1947–55). The last appointment made him director of the first Indian school of librarianship to offer higher degrees. He was president of the Indian Library Association from 1944 to 1953. In 1957 he was elected an honorary member of the International Federation for Information and Documentation (FID) and was made a vice-president for life of the Library Association of Great Britain.
